

# ARE YOU INTERESTED IN ARCHAEOLOGY?

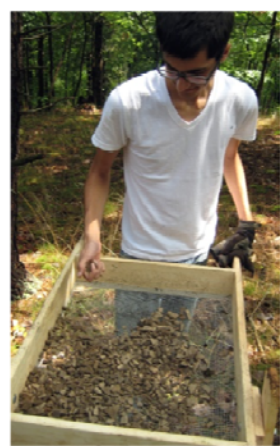

This flint knife, found in Huntingdon County at Sheep Rock Shelter, dates to ca. AD 1350

## ARCHAEOLOGICAL SURVEY METHODS

**AN 399 (3 credits)**  
**July 30-August 10, 2012**  
**Juniata College**  
**Raystown Field Station**

**\$480/credit; \$75 lab fee; Housing \$70/week**  
**Kitchen available for preparing your own meals**

This 2-week field course provides an immersion learning opportunity to gain hands-on experience in archaeological site surveying while earning 3 college credits staying at the Raystown Field Station. Participants will learn to: 1) identify prehistoric artifacts; 2) use laser survey instruments to collect three-dimensional spatial data; 3) create GIS base maps; 4) Identify and describe soils; and 5) excavate shovel test pits. Whether you plan to pursue a graduate degree in anthropology, work in cultural resource management, or are just interested in archaeology, this is a great chance to become versed in the field methods and equipment used by professional archaeologists.
